

EXTEND YOUR EXISTING RRH TRANSMISSION LINE INVESTMENT

Easy, Durable and Cost-efficient

Discrete cabling both fiber and power in FTTA applications can be seen at many sites today. However, in a constant hunger for bandwidth, new frequency bands and technologies are a must to live up to customer expectations. Efficiency and cost savings are nevertheless in focus.

With the field-installable Rosenberger FiberInLine and PowerInLine solutions existing fiber and power cables can be extended to fit new RRH architecture or active antennas.

FiberInLine

Features and Benefits

- Field-installable
- Fast and easy installation
- IP 68
- UV resistant
- Low wind load
- Extension tube for long fanout lengths available

PowerInLine

Features and Benefits

- Field-installable
- Suitable for conventional 2-wire power cables and 1–10 mm coaxial power cables
- IP 68
- Proprietary independent
- Fast and easy installation
- 360 deg. EME shielding
