Easy to Assemble

Economic Solderless PCB Connectors

TEST & MEASUREMENT
Solderless PCB Connectors

For a variety of standard applications Rosenberger has developed cost-effective, economic solderless PCB connectors. These straight connector types are designed to provide low return loss values for frequencies up to 70 GHz.

Economic solderless PCB connectors from Rosenberger can be easily mounted by using screws. Standard screws are included (other lengths available on request). Their mode-free design allows very good RF performance for standard applications in the fields of test and measurement, chip testing fixtures, board characterization or communication industries.

**Product Features**

- PCB connection – no soldering required
- RPC-1.85, RPC-2.40, RPC-2.92 and RPC-3.50 interfaces available
- Cost-effective connectors
- Mating cycles ≥ 500
- Reduced installation time
- For frequencies up to 70 GHz

For specific details refer to the technical datasheets in our online catalog
