One PCB Contact for Various Female Connector Heads

Modular Connector System
In cooperation with key customers, Rosenberger has developed a modular connector system which improves existing solutions and fulfills the increasing requirements of test and measurement industries: to cover the whole frequency range from DC to 50 GHz only one part of PCB contact has to be processed.

The opportunity to choose between the best known IEC interfaces enables a wide range of applications.

**Features**
- One PCB contact for various female connector heads
- Connector heads can be easily changed
- Different connector heads for different frequency ranges
- Casted center conductor
- Robust against multiple solder cycles
- Low profile
- Both sides of the PCB can be processed (apply solder paste)
- Service-friendly
- Locking screws with Tuflok

**Applications**
- High volume industrial production of high-end PCB up to 50 GHz
- Applications with different interfaces on one board
- Applications with repair-friendly products
- Applications where maintenance is important
The Rosenberger modular connector system consists of one PCB contact which can be connected with various female connector heads – SMA, RPC-3.50, RPC-2.92, RPC-2.40.
